

Hospitality Application

One Place to Connect—Many Ways of Connecting with PowerWave™ from guestLINK™

Connect with US!

Historically, fine hotels have provided more amenities than the average person had at home. The next major wave in Hospitality amenities is certainly HDTV and compatibility with portable media devices that will allow a guest to “plug and play” with their iPod, DVD player, digital still and movie cameras, cell phone or media-equipped notebook PC and portable video games.

Now, the new **guestLINK™** **PowerWave™** product line provides the opportunity to make it MORE. And, the ability to interface with all those portable devices is a low cost way to provide a pleasant surprise for today’s guest and meet the expectations of most guests in future years. That’s the Power of the wave. Ride it!
